

What an amazing year of church planting in the DFW area. We continue to get more and more churches that are eager and excited to partner together to plant churches in high growth areas around the DFW Metroplex. We have begun laying the ground work for a church plant on both the east side and south side of DFW. The Table Church Plant [www.TheTable380.church](http://www.TheTable380.church) has outgrown its current worship location and is moving to the Little Elm Community Center in January for worship every other Sunday Night. The Avondale/West Alliance church plant will gather every other Saturday Night for a time of worship starting in the new year and has begun the process of discovering its name.

With the DFW Metroplex continuing to experience exponential growth, it is so exciting to see the Spirit move and churches begin to work together. The Harvest is ready. Praise God as he continues to send us into those fields. From the team at Groundbreakers to Harvesters, we wish you a Blessed & Merry Christmas!
